Climbing

## Description

Slope access with climbing net **RETO H1350** is a modern addition to recreational spaces, encouraging active play on varied terrain. The structure consists of four steel posts, galvanized and powder-coated, with a pipe diameter of 76.1 mm and a wall thickness of 2 mm. A robust rope net made of polypropylene with a steel core (reinforced) is installed between the posts. Rope connectors are made of polyamide. The net enables children to safely climb the slope, supporting the development of coordination and balance, while the mounting system ensures high durability and user safety. The slope access blends seamlessly into the natural terrain, creating an aesthetic and functional feature for modern recreational areas.

## Playground device consists of

- 4 structural posts
- 1 climbing net

## Product details

- Dimensions (LxWxH): 2,29 x 2,52 x 1,75 m
- Safety area (LxW): 5,29 x 5,47 m
- Maximum fall height: 0,38 m
- Embankment height (L1): 1350 mm
- Embankment length (L2): 2414 mm
- Embankment width (L3): 2001 mm
- Age: 2+
- Number of users: 16
- Differences in dimensions no more than +/- 5% are acceptable

## **Materials**

- The structure is made of S235 steel, hot-dip galvanized and powder-coated, with pipes of 76.1 mm diameter and 2 mm wall thickness.
- Climbing net: 16 mm polypropylene rope with a steel core (reinforced).
- Rope connectors made of polyamide.
