Climbing

Description

Slope access with climbing net **RETO H2050** is a modern addition to recreational spaces, encouraging active play on varied terrain. The structure consists of six steel posts, galvanized and powder-coated, with a pipe diameter of 76.1 mm and a wall thickness of 2 mm. A durable rope net made of polypropylene with a steel core (reinforced) is installed between the posts. Rope connectors are made of polyamide. The net enables children to safely climb the slope, supporting the development of coordination and balance, while the mounting system ensures high durability and user safety. The slope access blends seamlessly into the natural terrain, creating an aesthetic and functional feature for modern recreational areas.

Playground device consists of

- 6 structural posts
- 1 climbing net

Product details

- Dimensions (LxWxH): 3,33 x 2,52 x 2,45 m
- Safety area (LxW): 6,33 x 5,47 m
- Maximum fall height: 0,61 m
- Embankment height (L1): 2050 mm
- Embankment length (L2): 3666 mm
- Embankment width (L3): 3039 mm
- Age: 2+
- Number of users: 20
- Differences in dimensions no more than +/- 5% are acceptable

Materials

- The structure is made of S235 steel, hot-dip galvanized and powder-coated, with pipes of 76.1 mm diameter and 2 mm wall thickness.
- Climbing net: 16 mm polypropylene rope with a steel core (reinforced).
- Rope connectors made of polyamide.
