Climbing

Description

Slope access with climbing net **RETO H3500** is a modern addition to recreational spaces, designed to encourage active play on varied terrain elevations. The structure is based on eight steel posts, galvanized and powder-coated, with a pipe diameter of 76.1 mm and a wall thickness of 2 mm. A durable rope net made of polypropylene with a steel core (reinforced) is installed between the posts. Rope connectors are made of polyamide. The net enables children to safely climb the slope, supporting the development of coordination and balance, while the mounting system ensures long-term durability and safe use. The slope access blends naturally into the landscape, creating a functional and visually appealing feature for modern recreational areas.

Playground device consists of

- 6 structural posts
- 1 climbing net

Product details

- Dimensions (LxWxH): 5,53 x 2,52 x 3,9 m
- Safety area (LxW): 8,53 x 5,47 m
- Maximum fall height: 0,78 m
- Embankment height (L1): 3500 mm
- Embankment length (L2): 6259 mm
- Embankment width (L3): 5189 mm
- Age: 2+
- Number of users: 33
- Differences in dimensions no more than +/- 5% are acceptable

Materials

- The structure is made of S235 steel, hot-dip galvanized and powder-coated, with pipes of 76.1 mm diameter and 2 mm wall thickness.
- Climbing net: 16 mm polypropylene rope with a steel core (reinforced).
- Rope connectors made of polyamide.
