Description

Slope access with climbing net **RETO H825** is a modern addition to recreational spaces, encouraging active play on varied terrain. The unit is based on four steel posts, galvanized and powder-coated, with a pipe diameter of 76.1 mm and a wall thickness of 2 mm. A durable rope net made of polypropylene with a steel core (reinforced) is mounted between the posts. Rope connectors are made of polyamide. The net enables children to safely climb the slope, supporting the development of coordination and balance, while the mounting system ensures high durability and user safety. The slope access blends naturally into the terrain, creating an aesthetic and functional feature for modern recreational areas.

Playground device consists of

- 4 structural posts
- 1 climbing net
