## Description

The Infano 5 two-tower playground play set with a slide is an attractive children's play structure featuring a unique design inspired by the shape of a snail. Bright colors and decorative elements encourage active play in kindergartens, schools, and parks. The set includes a slide, a bridge connecting the two towers, two access ramps, a roof, three panels with transparent windows, and a panel with a LUMO board featuring six rotating wheels emitting colorful light. The walls of the slide, towers, railings, and roof are made of durable HDPE board, resistant to damage and weather conditions. The welded structure (the use of clamps is not permitted) is made of high-quality stainless steel, resistant to weather conditions and intensive use. The structural tubes (including four bent tubes) are finished with spherical decorative elements resembling snail antennae. The floor and stairs are made of HPL board with an anti-slip texture, ensuring safe use while preventing overheating in the sun and excessive freezing in winter. The playground set complies with EN 1176 norm.

\* All stainless steel Limako products are available in galvanized and powder painted version.

## Playground device consists of

- 10 x structural pipes, including 4 bent pipes finished with spherical decorative elements
- 1 x tower with an openwork roof consist of 1 wall with a window and 1 decorative milling cutter
- 1 x tower with 1 wall with a window and 1 with a milling cutter
- 1 x slide with stainless steel handrails and sides finished with an HDPE board
- 1 x bridge with rope railings
- 1 x stairs to the tower with cut-out handles

- 2 x HPL entrance gangways and HDPE sides

### **Product details**

- Dimensions: 3,59 x 3,09 x 2,49 m
- Safety area: 6,89 x 6,09 m
- Free fall height: 0,59 m
- The height of the platform: 0,59 m
- Age: 1-5
- Number of users: 14
- A certificate confirming compatibility with norm EN 1176

### **Materials**

- The structure and additional elements (handrails, handles, supports, etc.) are made of AISI 304 stainless steel, using tubes with diameters of 76.1 x 2.0 mm (including two bent tubes), 33.7 x 2.0 mm, and 25.0 x 2.0 mm, as well as profiles measuring 40 x 40 x 2.0 mm.
- Panels made of three-layer colored HDPE material with a thickness of 15 mm,
- Transparent window made of polycarbonate,
- Wheel colors (6 pcs): 2 x blue, 2 x red, 2 x green,
- 10mm thick HPL platform with non-slip texture.
