## Description

The sensory board **EDITO 31** panel with a “Tic-Tac-Toe” game is a modern, interactive playground feature that combines fun with the development of logical thinking skills. The device has been designed with children using wheelchairs in mind. The robust structure is made of black steel, galvanized and powder-coated to ensure high resistance to weather conditions. The panel is constructed from durable HPL material, while the tubes are finished with aesthetically pleasing spherical decorative elements. The rotating game components are easy to use, allowing even the youngest users to enjoy the panel freely while developing motor coordination and social skills. It is an excellent addition to recreational areas, kindergartens, and public spaces, combining educational value with engaging play.

\* The board is also available in a stainless steel version.

## Playground device consists of

- 2 x posts
- 1 x panel with “Tic-Tac-Toe” game

## Product details

- Dimensions (LxWxH): 0,9 x 0,1 x 1,25 m
