Rocking

Sitting

Role-playing

Description

The **Duck Spring toy** is a perfect addition to any playground. Designed with the youngest users in mind, it combines safety, durability and an attractive design that captures the attention of both children and parents. The central decorative element is a red heart placed on the side of the duck – a symbol of joy, friendship and positive emotions that additionally stimulates the senses of touch and sight during play. The durable structure mounted on a steel spring ensures stability and safety, while the ergonomically shaped seat in a contrasting colour provides comfort. Comfortable handles and footrests make rocking easier, and durable, weather-resistant materials ensure long-term use. The entire unit is carefully finished with rounded edges for safety. It is an excellent choice for kindergartens, schools, housing estates and public spaces that aim to create a safe and positive play environment.

The **Duck Spring toy** has been designed with durability, safety and functionality in mind. The structure is made of hot-dip galvanized and powder-coated S235 steel, pipes with a diameter of 33.7 mm and a wall thickness of 2 mm. The decorative element and the seat are made of 15 mm thick HDPE plastic. The handles in black colour are made of polypropylene. A decorative element in the shape of a heart made of colored, transparent plastic.

Playground device consists of

- 1 duck-shaped spring toy
- 1 seat
- 2 handles
- 2 footrests

- 1 decorative heart-shaped element

Product details

- Device dimensions (LxWxH): 0.92 x 0.22 x 1.04 m
- Safety zone dimensions (LxW): 3.62 x 2.22 m
- Maximum free fall height: 0.56 m
- User age: 1–8
- Number of users: 1
- Dimensional tolerances up to +/- 5% are allowed.
